## FEATURES

- Test disconnect terminal block is produced with 3 options; without test socket, single test socket and double test socket.
- It creates the possibility to test through touch-proof test sockets by using the test plugs.
- Without disconnecting the cables, the energy connection can be cut with the screw disconnect slide in the main body.
- It creates the possibility to test as groups with the 90° fork type plug-in bridge that can be used directly with test sockets.
- Standart MRK6 plug-in bridge can be used for this product optionally.
- It is aimed to mount the product properly with its special leg design.
- It is appropriately designed to use with the existing OD 5, OD 10 dekafixes and the Roll Labelling.
